ENGINEERING CYBERNETICS

Soviet journal of computer and systems science

Contents for 1977

Number 1

	English Page	Russian Page
MANAGEMENT AND OPERATIONS RESEARCH		
B. N. Pshenichnyy and A. A. Chikriy: A Differential Game of Avoidance	1	3
B. T. Polyak: Comparison of the Speed of Convergence of Single-Step and Multi-step Algorithms of Optimization When There are Noises	6	9
L. A. Chumakova and V. N. Semenov: Application of Linear Programming to the Solution of Certain Problems of Architectural and Building Planning	10	13
N. V. Kotov and V. N. Zakharov: Optimization of an Estimational Function in Decision Making	20	24
ARTIFICIAL INTELLIGENCE AND ROBOTICS		
I. G. Bider and I. A. Bol'shakov: A Formalization of the Morphological Component of the "Meaning ⇔ Text" Model II. Dynamics of Morphological Transformation	28	32
F. M. Kulakov: Organization of Supervisory Control of Robots-Manipulators. III	42	51
V. S. Kuleshov and A. S. Yushchenko: Some Algorithms for Position Control of Manipulator	55	67
QUEUEING THEORY AND RELIABILITY		
I. A. Ushakov and Ye. I. Litvak: Upper and Lower Estimates of Parameters of Two-Pole Networks	59	72
V. P. Mudrov: A Model of a System with Distribution of Time When There is Cyclic Servicing of Orders	67	80
N. N. Popov: Queueing Systems Controlled by Semi-Markov Processes	74	94
AUTOMATA AND COMPUTERS		
A. A. Papernov and M. I. Pomerantsev: A Method of Optimal Permutation of Blocks in a System of Informational Search	82	102
G. L. Levitan: Use of Deductive Inference in Situation Control Systems	87	108
A. F. Blishun: A Two-Dimensional Cellular Growth Model of Automata	94	116
V. V. Lipayev and I. A. Troitskiy: Effectiveness of Organization of a Computing Process in Master Digital Computers by the Methods of Scheduling Theory	101	124
INFORMATION PROCESSING		
Yu. G. Sosulin and A. P. Shakhurin: Analysis of Bayesian Algorithms for Simultaneous Detection and Estimation	107	130
Yu. V. Zhulina: Control of a Statistical Observation with Minimization of the Risk Associated with Displacement of Servicing Points	115	138

Yu. G. Sosulin and A. P. Shakhurin: Analysis of Bayesian Algorithms for Simultaneous Detection and Estimation	107	130
Yu. V. Zhulina: Control of a Statistical Observation with Minimization of the Risk Associated with Displacement of Servicing Points	115	138

	English Page	Russian Page
B.A. Grishanin and G.Ye. Kolosov: Analytical Solution of the Problem of Optimal Quantization of Random Processes	126	148
V.Z. Sokolovskiy: Quasioptimal Filtering of Random Functions	135	158
AUTOMATIC CONTROL		
R.A. Kamal'dinova and I.V. Korol'kov: Investigations of Oscillations at Double Frequency, Using a Generator with a Cylindrical Resonator as an Example	139	162
A.G. Kulichenko, L.I. Matyukhina and A.S. Mikhalev: Stability of Induced Motion of Variable-Structure Systems	146	169
B.I. Shakhtarin, V.D. Gubin and R.S. Kholmskaya: Features of Harmonic Linearization of Systems with Periodic Characteristics	152	175
V.S. Leybovich: Estimation of a State in Discrete Systems with Lagging Observations	158	181
AUTOMATION OF RESEARCH PROCEEDINGS		
M.M. Gurariy and S.G. Rusakov: Machine Computatica of Complex Electronic Systems by the Method of Subsystems	164	193
V.N. Pugachev and V.O. Moiseyev: A Combined Method of Estimation of the Accuracy of Complex Systems from the Results of Statistical Trials	168	198

Number 2

MANAGEMENT AND OPERATIONS RESEARCH		
A.G. Chentsov: A Game Problem of Approach in a Properly Linear System	1	3
P.B. Gusyatnikov and L.P. Yugay: A Problem of Avoidance in Nonlinear Differential Games with Terminal Set of Complex Structure	5	8
L.Ye. Sadovskiy, L.Sh. Ioffe and G.B. Kleyner: Questions Regarding Simulation of Hierarchical Systems	12	14
S.M. Porotskiy: Two-Step Stochastic Problems of the Transport Type	20	23
Yu.M. Tsodikov and A.S. Khokhlov: Extrapolation for Internal Penalty Functions	29	32
L.V. Litvintseva: A Question-Answer System Which Reproduces Information in a Normalized Natural Language	36	39
Ye.I. Yefimov: Simulation of Chess End-Games by Automating the Proof of Theorems	43	47
QUEUEING THEORY AND RELIABILITY		
G.K. Mishkoy: A Queueing System with Absolute Priority	44	61
L.M. Abol'nikov: Investigation of a Class of Discrete Markov Processes	51	69
Yu.N. Kornyshev: A Single-Line System with Repeated Orders and Preliminary Servicing	63	83
M.G. Teplitskiy: A Problem of Optimal Control of a Markov Chain from Incomplete Data	68	89
E.I. Shkol'nyi: Estimates of the Loss Probabilities for a Queueing System with Repeated Calls	74	95
AUTOMATA THEORY		
Sh.E. Bozoyan: Construction of Reliable Circuits Realizing a Finite Automaton from Unreliable Components	79	100
E.L. Kornoushenko: The Generalized Problem of Testing the Correctness of Functioning of a Finite Automaton	87	109
A.A. Siymon: The Language of Vector Switching Functions to Describe Logic Circuits	94	116
A.A. Lopukhov and V.A. Kalashnikov: Decomposition of Automata Structures into Functional Blocks	102	125

	English Page	Russian Page
COMPUTER NETWORKS		
V.I. Bober, B.A. Stolyarov, B.Ya. Ettinger and G.F. Yanbykh: Synthesis of Computer Networks for Hierarchic Control Systems. I	107	130
INFORMATION PROCESSING		
I.G. Tikhomirova and P.A. Bakut: Detection of Random Signals of Random Duration	114	137
V.O. Vyazemskiy: On the Transformation of Recursive Random Signal Trains in the Circuit of an Information Measuring System	118	140
V.N. Prokof'yev: Measurement of the Frequency of a Signal in a Channel with Unknown Noise Strength	128	153
V.S. Molodtsov: Statistical Calculation of Delta Modulation	132	156
AUTOMATIC CONTROL		
B.N. Petrov, Ye.D. Teryayev and B.M. Shamrikov: Conditions for Parametric Identifiability of Controllable Objects in Open-Loop and Closed-Loop Automatic Systems	137	160
A.T. Barabanov and O.S. Selivokhin: Asymptotic Analysis of Processes of Controllable Approach. I	152	176
I.N. Beloglazov: Optimum Filtering in Correlation Extremum Systems Which Use Topographical Images	160	185
I.V. Filatov and S.N. Sharov: An Investigation of Parametric Sensitivity of Nonlinear Dynamic Correcting Devices	166	192
A.S. Saf'yan: An Adaptive Procedure for Estimation of Lexicographically Preferable Alternatives	170	196
N.G. Boldyrev and T.N. Cheboksarova: Algebraic Approach to the Classification Problem	181	207
R.I. Sosnovskiy: Conditionally Optimal Planning of an Experiment	186	214

Number 3

MANAGEMENT AND OPERATIONS RESEARCH		
D.B. Yudin and A.S. Nemirovskiy: The Effectiveness of Random Search in Control Problems	1	3
V.Ye. Krivonozhko: A Decomposition Algorithm for Linear Dynamic Programming Problems	14	18
Ye.M. Berkovich: Numerical Solution of Certain Multistage Stochastic Optimal Control Problems	21	26
A.I. Cherepanov and V.Z. Vil'khovetskiy: Quasidynamic Models of Optimal Planning and Control in Hierarchical Systems	30	36
B.G. Medvedev: A Controllable Experiment in Systems of Control of Social-Economic Processes. I	38	45
L.N. Timonov: An Algorithm for Search of a Global Extremum	38	53
QUEUEING THEORY AND RELIABILITY		
I.V. Pavlov: Admissible Interval Estimates for Functions of Several Unknown Parameters. I	45	61
K. Arndt: Calculation of the Reliability of a Duplicated System by the Method of Embedded Semi-Markov Processes	54	70
G.S. Pashkovskiy: An Optimal Algorithm for Discrete Search for Malfunctionings	63	80
V.V. Kalashnikov: Continuity of the Characteristics of Regenerating Processes	71	87
Yu.K. Belyayev, A.G. Gadzhiyev, Yu.I. Gromak and T.N. Dugina: A Comparative Analysis of the Simplest Systems of Vertical Transport	81	97

	English Page	Russian Page
COMPUTER AND AUTOMATA THEORY		
V.I. Bober, B.A. Stolyarov, B.Ya. Ettinger and G.F. Yanbykh: Topological Synthesis of Computer Networks for Hierarchic Control Systems. II ...	82	104
V.I. Levin: Logical Determinants and Automata with Continuous Time. I. Theory of Logical Determinants	90	113
V.V. Logvin and V.L. Perchuk: A Mathematical Model for Logical-Differential Systems with Distributed Parameters	100	123
V.G. Lazarev and S.M. Starobinets: The Use of Dynamic Programming for Optimization of Control in Networks of Commutation of Channels	107	132
INFORMATION PROCESSING		
V.L. Levshin: A Generalized Frequency Method for Description of Dynamics of Image Analysis in Optical Direction Finding Systems	118	141
Yu.G. Sosulin and M.M. Fishman: Optimum Detection of Signals with a Random Time of Appearance	125	149
A.F. Terpugov and F.A. Shapiro: Two-Step Search for a Signal in a Multichannel System with Grouping and Ordering of the Channels	133	156
AUTOMATIC CONTROL		
N.V. Saburov and A.M. Puchkov: The Principle of Combination of Adaptive and Functionally Logical Controls	134	165
V.M. Gorlov: A Method for Solving the Problem of Optimal Fast Action ...	143	176
S.N. Korobkov: Structure of Optimal Nonlinear Controls Designed According to the Criterion of Generalized Work	148	182
AUTOMATION OF RESEARCH PROCEDURES		
V.A. Ivnitskii: On an Estimate of the Accuracy of the Results of Simulation of Complex Systems	156	191
S.V. Avrutik and S.M. Kaplun: An Investigation of the Multi-Dimensional Region of Allowed Solutions in Design of Technical Systems	166	202

Number 4

L.A. Miroshnichenko, V.A. Rayevskiy and G.M. Markelov: Orientation and Stabilization System of the Television Broadcasting Satellite "Ekran" .	1	18
A.P. Razygrayev and A.I. Gurin: Guidance for Soft Landing of a Space Vehicle in a Designated Region on the Surface of Mars, Based on Principles of Terminal Control	8	28
MANAGEMENT AND OPERATIONS RESEARCH		
Yu.P. Ivanilov and B.M. Mukhamediyev: Linear Multistage Games with Conflicting Interests	17	49
Yu.A. Zak and N.L. Kir'yan: The Stochastic Problem of Distribution of a Limited Resource	23	56
S.I. Khmel'nik: A Multicriterial Problem on Assignments	31	64
S.M. Movshovich and T.D. Berezneva: A Model of Economic Dynamics ...	34	67
M.K. Kozlov and V.V. Shafranskiy: Calendar Planning for the Fulfillment of Complexes of Operations in the Case of Given Dynamics of Receipt of Cumulative Resources	41	75
ARTIFICIAL INTELLIGENCE AND ROBOTICS		
Z. Kul'pa: Systems for Analysis of Graphic Images and Their Software	48	82

	English Page	Russian Page
G. V. Korenev and V. S. Pridvorov: On Stresses Developed in Muscles During Guided Motion	53	89
RELIABILITY AND QUEUEING THEORY		
O. Sakhobov and A. D. Solov'ev: Two-Sided Estimates of Reliability in a General Standby Model with One Renewal Unit	58	94
P. Franken and K.-P. Heuser: Estimates of the Indices of Reliability for Redundant Systems with Renewal	64	100
L. B. Groysberg and Yu. G. Pollyak: Comparison of the Variants of a System in Probabilistic Simulation of the Reliability	70	106
G. K. Mishkoy: Servicing with Orientation and Two Kinds of Relative Priority	73	110
M. I. Volkovinskiy and A. N. Kabalevskiy: Analysis of Multiple-Level Priority Systems with Training and Readjustment of Servicing Device. I. General Model. Periods of Occupancy	79	115
L. B. Shvarts: Optimal Priorities in a Single-Line Queueing System with Losses and an Unreliable Line	84	120
THEORY OF AUTOMATA		
V. I. Levin: Logic Determinants and Continuous Time Automata. II. Automata without Memory	88	124
V. A. Gorbatov and S. V. Makarenkov: Semantic Methods to Reduce the Difficulty in Designing Multi-Output Minimal Boolean Structures	98	135
A. N. Melikhov and L. S. Bershtein: Operations on Hypergraphs and Their Properties	106	142
A. P. Goryashko: An Optimum Method of Synthesis of a Reliable Universal Automaton	113	150
D. V. Speranskiy: A Method for Construction of Hybrid Chips Which Can Be Diagnosed with a Specified Resolution Capability	118	156
INFORMATION PROCESSING		
Ye. P. Churakov: Multichannel Discrete Systems with Possible Vanishing of the Controlling Signal	126	165
L. Ye. Shirokov: Optimal and Suboptimal Filters for Estimating Continuous Phase Coordinates	132	172
L. G. Kankanyan: Informational Estimates for the Variance of the Risk and the Probabilities of Wrong Decisions in Problems of Optimal Statistical Decisions	142	181
AUTOMATIC CONTROL		
A. T. Barabanov and O. S. Selivokhin: Asymptotic Analysis of Processes of Controllable Approach. II	148	186
N. V. Kukharenko: Determination of the Coefficients in Quadratic Functionals in Problems of Analytical Construction	159	197
N. B. Yegorova, G. V. Yepifanov, M. G. Mel'nikova and L. V. Chernysheva: Organization of Search Operation in an Information Retrieval System of the Documentation Type	164	202
A. M. Shubladze: Methods of Identification of the Parameters of Linear Dynamic Objects in Noises	170	209

Number 5

MANAGEMENT AND OPERATIONS RESEARCH		
N. N. Subbotina and A. I. Subbotin: A Game Problem of Control in the Case of Incomplete Information	1	14

	English Page	Russian Page
V.A. Gorelik and M.S. Shtil'man: A Game Approach to the Choice of Structure of Functioning of a Two-Level System under Conditions of Indeterminacy	11	24
V.V. Rozen: Games with Ordered Outcomes	18	31
M.K. Kozlov and V.V. Shafranskiy: Time Scheduling of Operation Complexes with Limited Intensities of Execution of Component Operations	25	38
V.V. Podinovskiy: Two-Criterial Problems with Unequally Rated Criteria	30	44
ARTIFICIAL INTELLIGENCE		
Ye.I. Yefimov and D.A. Pospelov: Semiotic Models in Planning Problems of Artificial Intellect Systems	37	60
QUEUEING THEORY AND RELIABILITY		
S.F. Yashkov: Distribution of the Conditional Waiting Time in a System with Division of Time	44	88
I.V. Pavlov: Admissible Interval Estimates for Functions of Several Unknown Parameters. II	52	95
M.M. Zarubina and Ya.P. Lumel'skiy: Estimation of the a priori Distribution of the Number of Defective Articles	62	106
COMPUTERS AND AUTOMATA		
D. Bochmann: Boolean Differential Calculus (A Survey)	68	125
V.I. Levin: Logical Determinants and Automata with Continuous Time. III. Automata with Memory	76	134
INFORMATION PROCESSING		
I.A. Bol'shakov and V.S. Rakoshits: Application of Orthogonal Systems of Discrete Functions to Microprocessor Processing of Signals. I.	85	143
Yu.S. Kharin: Adaptive Formation of Invariant Features in the Problem of Pattern Recognition	99	158
A.Ya. Gorodetskiy: Reproduction of a Markov Communication from a Discrete Random Sequence	106	165
AUTOMATIC CONTROL		
A.A. Krasovskiy: A Suboptimal Algorithm for Identification of Dynamic Objects	109	168
B.I. Shakhtarin: Stability of Motions of a Nonlinear System with a Periodic Characteristic	114	174
V.P. Perov: Synthesis of Multidimensional Systems in an Orthogonal Basis That are Optimal with Respect to a Generalized Criterion	123	183
G.K. Kel'mans and A.S. Poznyak: Algorithms for Control of Dynamic Systems on the Basis of Local Optimization	134	194
M.F. Trofimov: Multiloop Systems with a Single Class of Regulators	142	202
S.I. Klimentov and V.D. Furasov: Synthesis of Dynamic Regulators in the Case of Incomplete Information Regarding the State and the Parameters of Nonstationary Control Objects	151	211

Number 6

MANAGEMENT AND OPERATIONS RESEARCH		
I.V. Yezhkova and D.A. Pospelov: Decision Making on Fuzzy Grounds. I. A Universal Scale	1	3
I.A. Ushakov and A.V. Yasenovets: Statistical Methods of Solving Problems of Optimal Stand-By	8	12
L.T. Buslayeva: Program, Random, and Positional Control in Game Problems	16	22
R.K. Galimov: Minimax Distribution of a Resource in Games with Choice of Instant of Time	20	27

	English Page	Russian Page
V.V. Fedorov: A Two-Step Stochastic Decision-Making Problem with Noncoincident Interests on the Part of the Participants	28	36
V.T. Babkin, A.L. Gasretov and V.F. Zolotukhin: A Branch-and-Bound Algorithm for Solving the Generalized Problem of Optimal Assignment	37	46
Yu. Dubov and A.B. Kopeykin: Extremal Properties of the Problem of Choosing a Target	43	53
B.G. Medvedev: A Controllable Experiment in Systems of Control of Social-Economic Processes. II	44	59
QUEUEING THEORY AND RELIABILITY		
M.A. Fedotkin: Control of Conflicting Flows of Orders on the Basis of Minimal Information Regarding the State of a System with Variable Servicing Structure. I	49	65
I.V. Pavlov: Monotonic Confidence Limits in the Class of Distributions with Increasing Function of the Failure Rate	55	72
A.A. Nazarov and A.F. Terpugov: The Finding of Optimal Dynamic Priorities in the Case of Oblique Observations	66	85
G.S. Pashkovskiy: Hierarchical Models of Experiments in Bayesian Theory of Decision Making (Generalization of Problems of Search for Defects)	72	91
V.V. Zdor: Definition and Assignment of Tolerances on the Parameters of Control Systems	80	100
COMPUTERS AND AUTOMATA THEORY		
N.I. Mikhaylova: Optimization of the Structure of a Batch of Applied Programs for Data Processing in Real Time	88	110
V.V. Logvin and V.L. Perchuk: DISTAL Language and a System of Simulation of Logical Differential Systems with Distributed Parameters	93	116
V.M. Kureychik: Application of Structural Numbers for the Construction of Independent Subsets of Vertices of a Graph	94	126
V.I. Varshavskiy, A.M. Zabolotnyy and F. Seredinski: Homogeneous Games with an Associated Exchange Process	99	132
INFORMATION PROCESSING		
A.D. Yudin: Informative Structures of Multidimensional Random Variables	102	135
V.M. Artem'yev and V.L. Stepanov: Optimal Filtering with Control of the Observation Process	110	145
Yu.S. Natkovich: A Noise Classifier is Signal-Detection Systems	116	151
T.A. Radchenko: Characteristics of a Bayesian Estimate in the Case of Uncertainty as to the Presence of a Signal	123	159
AUTOMATIC CONTROL		
V.N. Brandin: A Sufficient Condition for Controllability of Nonlinear Systems with Constraints on the Control	124	164
M.F. Trofimov: Control of Multiply Connected Objects with Crossed Feedbacks	127	167
Ye.M. Smagina: Synthesis of Nonstationary Linear Systems with Given Dynamic Characteristics	131	172
V.P. Sizov: Algorithms for Optimal Estimation of the State of Statistically Indeterminate Linear Dynamic Systems	139	180
AUTOMATION OF RESEARCH PROCEDURES		
V.I. Smirnov and A.M. Tikheyeva: The Connection between the Bayesian Risk and the Kolmogorov Distance and a Modification of It in Recognition Problems	147	189
N.S. Demin and V.V. Petrov: Interpolation of the State of a Stochastic System with Step-Form Parameters from a Set of Continuous and Discrete Observations	150	193
